Dear Sir/Madam:

I am a practicing attorney in Huntsville-Madison County, Alabama and have been practicing for over 20 years. I became acquainted with Sanford "Sandy" Loy in February of this year. I employed him to serve as an expert witness in one of my most prominent cases and have been extremely impressed with the results. Sandy's professionalism and upstanding character have earned my respect as an employer and friend.

Sandy possesses extensive knowledge in many differing facets of the construction business. His resume includes titles such as Director of Engineering Services, Project Manager, and Director of Development and Construction. He has headed several multimillion-dollar ventures for companies such as TVA and Belz Enterprises. Founder and president of his own company, Sandy is a Certified Construction Manager in addition to his numerable qualifications.

It is my opinion that Sandy Loy would serve as a critical supporting role for any case in which features building construction and management. His testimony has proven invaluable to me. His familiarity with the financial aspects and the standard methods of management used in construction has established an expertise befitting his 35 years in the field. I am confident that he can, in this capacity, contribute greatly to future employment as an expert witness.

Respectfully yours,

Kevin D. Heard
