ENGINEERING EXPERIENCE

Sherlock Smith & Adams, Montgomery, AL - April 1994 through March 2000
Electrical Engineering Project Manager

- Designed electrical systems for governmental, commercial, and industrial projects; marketed engineering services and wrote engineering proposals for a global market. Primary projects include hospital renovations.
- Marketed engineering services to schools throughout the state of Alabama and worked closely with the Board of Education in areas that utilized our services.

Averrett Consulting, Inc., Montgomery, AL – April 2000 through November 2006

President

- Developed, implemented, and self-funded a business-plan to provide Master Planning services to the military. Clients include the Atlantic Division of the US Air Force (LANTDIV), AAFES (the military retail services provider), and several local architects.
- Expanded the business to provide design and construction management services for the growing automotive industry in Alabama.

Goodwyn Mills & Cawood, Inc., Montgomery, AL – November 2006 through present

Executive Vice-President

- Worked with upper management to begin an electrical department with the goal to retain all electrical work in-house – currently manage a staff of seven employees.
- Engineer of Record for the electrical and communication design of municipal projects – primary projects include water and wastewater treatment plants, lift stations, pumping stations, and water tanks.
- Engineer of Record for the electrical and communication design of architectural and private clients – primary projects include industrial facilities, colleges, schools, banks, apartment complexes, landscapes, and private residences.
- Negotiated all municipal, architectural, and private contracts.
