Expert Details :

Expert in General Engineering Construction & All Types of Transportation

Location :

Temecula California, USA

Details :

Expert has more than 26 years of experience with underground construction, directly overseeing placement of underground utilities, pipelines and conduit. He has provided consulting services for major U.S. communities, including the Freedmens Town Brick Streets Project in Houston and Vista Canyon Ranch Sewer Siphon Project.

Expert has provided consultation and expert witness work for such firms as Heffernan & Boortz LLP, Wood Smith Henning & Berman LLP, Rutan & Tucker LLP, and Dowling/ Aaron, Chancio Brown LLC., Southern California Edison, Vast Networks (CVIN), City of Kansas City Missouri, and the City of Oceanside.

One of Mr. Aanestads companies was honored for its work on the Scripps Seawater Return Lines at the University of California, San Diego. The complex, \$2.5 million project included nearly 4,500 feet of piping. His companies have provided General and Civil Engineering Construction work that include the placement of 2400 feet of 42 inch HDPE pipeline under and accross and ocean inlet, placement of 12000 feet of fifty two slick 1 1/4 to 2 inch fiber-optic conduit through a downtown bay area town for Fluor Global. Mr. Aanestads companies have provided turn-key and subcontractor work for hundreads of jobs that include sewer pipeline, water pipeline electric conduit infrastructure, fiber-optic conduit infrastructure, storm drain pipeline, gas pipeline, hyddroauger and soil remediation pipeline. Mr. Aanestad has provided complex design, implamentation, and service for the full service truck leasing and rental, transportation logistics including warehousing, transport, truck sales and contract maintenance industry. Some customers include the Motion Picture and Entertainment industries, Target stores, and Mcdonnell Douglas.
