

Wall Accident Reconstruction, Inc.

DAN W. WALL, B.S.M.E., ACTAR No. 1140

Since 1987

ACCIDENT RECONSTRUCTION & BIOMECHANICS

Dan Wall, the principal expert for WARI, has conducted scientific and engineering analysis of motor vehicle collisions since 1987 for both the plaintiff and the defense in civil and criminal cases in Arizona and across the nation. Cases included work with insurance companies, manufacturers, attorneys, cities, states, and individuals. Cases have broadly involved different types of vehicles and objects including heavy trucks, automobiles, motorcycles, bicycles, pedestrians, boats, buses, construction equipment, trains, and others. Cases have included analysis of rollovers, low speed collisions and whiplash injuries, tire failures, articulated vehicles, accident avoidance, seat belt defense, injury prevention, slip and falls, construction zones, road defects, off-road driving, kinematic analysis, boating, etc. Dan Wall has qualified numerous times in civil and federal courts in the areas of accident reconstruction, product liability, biomechanics and human factors.
